

This is a treatment, from a modern Austrian perspective, of the history of economic thought up to Adam Smith, and as such takes into account the profound influence of religious, social and political thought upon economics. The author contends that laissez-faire liberalism and economic thought itself began with the Catholic scholastics and early Roman and canon law, rather than with Adam Smith. The scholastics, he argues, established and developed the subjective utility and scarcity theory of value, as well as the theory that prices, or the value of money, depend on its supply and demand. This continental, or pre-Austrian tradition, was destroyed, rather than developed, by Adam Smith whose strong Calvinist tendencies towards glorifying labour, toil and thrift is contrasted with the emphasis in Scholastic economic thought towards labour in the service of consumption. Tracing economic thought from the Greeks to the Scottish Enlightenment, this book includes all the important figures in each school of thought, with their theories assessed in historical context.
