

Minimally invasive procedures have become established in the surgical armamentarium and have a major impact on the speed, cost and recovery time of many operations as well as patient comfort. As compared to open surgery, laparoscopic surgery requires complex technical support equipment. Management of the technical aspects is essential for the success of laparoscopic procedures. This CD-ROM allows the user to learn all the steps of laparoscopic gastrojejunostomy. Preoperative work-up, establishing the diagnosis, and preparing the ward and the operating room are trained interactively. Each step in the operation must be simulated by the user. The course of the operation is demonstrated in extensive video sequences. To increase the learning effect, wrong decisions and the risks they may involve are discussed. This interactive teaching program is no substitute for hands-on training in the operation room under the guidance of an experienced laparoscopist, but it does prepare the surgeon for it by providing all the theoretical knowledge he or she will need to perform laparoscopic gastrojejunostomy successfully.

Godfrey Morgan - Scholars Choice Edition, An Imagined World: A Story of Scientific Discovery (Ann Arbor Paperbacks), A voyage towards the South Pole, and round the world. Performed in His Majestys ships the Resolution and Adventure, in the years 1772, 1773, 1774, ... two volumes The fourth edition.
